HI {MERGE:{FIELD:FIRSTNAME}},

The coronavirus crisis is reshaping the world, and we're all adjusting to a new normal. Having said that it's good to report that for us, the spend on infrastructure, and the push to keep projects going, has resulted in plenty of work still being on.

But it's not just about the pandemic - for parts of the country, there's the fires that hit hard and wiped out businesses, homes and schools. 2020 has certainly thrown a few curve balls but it's great to see community support and good old Aussie spirit helping us get by one day at a time.

Rebuilding Glengarry

At the beginning of the year the Morton fires tore through Scots College's Glengarry campus in NSW Southern Highlands. Four staff residences, two student dormitories, power and sewerage utilities and some external buildings and equipment were destroyed. The traditional six-month residential outdoor education program for year 9 students at Kangaroo Valley was relocated so the re-build could get underway.

The project has started and a 38,000 litres Septic tank was purchased for the new facilities, and left our factory on the back of a truck heading down to Kangaroo Valley,

The Halgan Environmental range of septic tanks are designed for sewerage treatment with baffles and come in volumes from 5.000 to 52.500 litre. The double-walled design ensures they are especially robust but being made from HDPE means they are lower in weight than concrete and steel. The septic tanks are easy to clean due to the smooth inner wall, easy to handle and installation is simple with all inclusive accessories included and completely fitted. This means fast installation and fuss free ongoing maintenance.

PUMPING THROUGH THE PROCESS

Manufacturing plants by their very nature require specialty equipment to produce goods on a large scale. When we were approached by Intergrated Water Systems for a 20,000 litre horizontal pumpstation for the Jalco Group who make cleaning products in Prestons, we had just the unit.

Lightweight, double walled and highly durable Halgan Environmental's pump stations come in a variety of sizes right up to 52,000 litres.

CUSTOMISING FOR CADDENS

It's always interesting to get a custom project, and when a RWIGS10,500 was required for a job in Caddens, we had just the solution for the project.

The customer normally makes ballast out of concrete so our RWIGS required some modification, with 5 pipes being welded into the tank, and the inlet increase to 160mm. Great little project to change things up, and certainly shows how easy it is to adapt our units.

FOOD FOR LIFE - HELPING THOSE IN NEED

Right now the world can do with a little kindness which was why we were only too happy to help out the team from Food For Life in North Sydney when they told us they were renovating their kitchen and were in need of a 1500 litre greasetrap.

The Sydney arm of Food for Life was established in 1995 and it is managed by over 250 volunteers. Every year they prepare and distribute food to over 60,000 people in need in the community. The charity is supported by global firms like Baker & McKenzie and personalities like Sir Paul McCartney.

We join a list of corporate citizens including Mitsubishi Electric, Taubmans, Makita, 3monkeez and Tomkin who donated to Food For Life so they can continue to help those in need.

FIRST TIME MAGIC

MF Plumbing purchased and installed a couple of MGTS™1500 for some new shops in Toukley. Fadi asked for a site visit as he hasn't installed Halgan products before but it was great to see he was very happy with units. He said the installation was in a tight site where only smaller machine could operate. Installation was perfect for their first job.

PCYC SLACKS CREEK

The team at Naba Plumbing are installing a MGTS™2000 at P.C.Y.C. - Slacks Creek. Ben Scalzo delivered the units and Dan said they are only completing Stage 1 at the moment which is just the main building. The other buildings surrounding the two new A.F.L. Fields will be another stage down the track. Good to see local infrastructure is still going on.

MORE BEDS IN BRISBANE

Tricare is developing a palliative care facility at Ashgrove in Brisbane's west. The 163-bed development is part of a push to create more housing options for Brisbane's older residents. The project has a budget of over \$30million with A.P.S. Plumbing is installing a MGTS™4000D and a 3000 litre lint trap to service the facility.

SUPPORTING AUSTRALIAN MADE, AUSTRALIAN MANUFACTURING

We have passionate team at Halgan and it was great to see this on show recently. We had a number of the sales team involved in the chase to win a job and beat imported products.

We pushed the quality angle to the consultant, architect and builder, and they could see the advantages of this, and supporting Aussie made product, over price.

Halgan's NSW/ACT BDM, Andrew LeClaire said "Sales like these make me proud that I have been able to give my fellow workers more work, I have helped a bit with the countries economy against foreign made products, I've supported the company I work for and myself. My job is to sell! It's inspiring and encouraging to work with such a committed team.
